

Screening & Prevention Performance

Note that the percentage achievement shown below is for those patients who received the service. Additional patients may have been invited for the service, but declined to receive it. In this section, achievement is measured against the national target, or the local average achievement, where there is no national target. (Gold for achieving target and above).

	Practice Achievement %	Practice 'Podium Position' based on Kent and Medway average	Kent and Medway Average %	PCT Average %	More than 10% below target/average	Up to 10% below Kent and Medway Average	Target/average or above
Influenza immunisations for over 65s % of patients over 65 who had a 'flu vaccination National target - 75%	72.70	Silver	72.90	73.40	Less than 65%	65-74.9%	75% plus
Influenza immunisations for under 65s in a clinical risk group % of eligible patients under 65 who had a 'flu vaccination No national target - Kent and Medway achievement average 48.04%	47.60	Silver	48.04	46.00	Less than 38.04%	48.03-38.04%	48.04% plus
Cervical Screening Programme % of eligible females who had a smear National target - 80%	79.21	Silver	80.89	82.13	Less than 70%	70 - 79.9%	80% plus
Childhood Immunisations - MMR immunisation by age 5 years - % of eligible children who had received a 1st dose MMR vaccination National target - 95%	97.00	Gold	93.00	92.30	Less than 85%	85 - 94.9%	95% plus
Childhood Immunisations - MMR immunisation by age 5 years % of eligible children who had received a 1st and 2nd dose MMR National target - 95%	92.90	Silver	87,54	87.40	Less than 85%	85 - 94.9%	95% plus
